ABOUT

Software engineer with 5+ years of experience building web applications, from pixel-perfect UI to the API behind it. I like solving problems and turning messy ones into simple, maintainable software.

EXPERIENCE

Fullstack Developer · Software Mind

March 2022 – present

- Agile work and finance management platform for a Scandinavian client, built in a Polish–Finnish team.
- React, TypeScript, Node.js, Express, MUI, SQL, Figma, Git.

Frontend Developer · Ultimate Systems

June – September 2021

- React platform for a pharma client and several WordPress sites.
- React, WordPress, JavaScript, PHP, Sass, Figma, Git.

EDUCATION

Computer Science, MSc

AGH University of Science and Technology, Kraków · Faculty of Electrical Engineering, Automatics, Computer Science and Biomedical Engineering

Mathematics and physics profile

2015 – 2018

I LO im. Antoniego Osuchowskiego, Cieszyn

PROJECTS

Private Kindergarten Management System (React, Sass, Django, PostgreSQL, REST)

Support for running a private kindergarten: a calendar of announcements for parents, blog, chat and a file manager.

Rick and Morty Universum (React, Redux, Sass, Strapi, REST)

Characters fetched from the public API, with accounts, comments and favourites.

Silesian Hospitals Info (React Native, Python)

Mobile app with essential data about Silesian hospitals and wards (free beds, contact, map), served by my own API.
